- 20 RAILWAY STATION Originally planned by Wiltshire, Somerset and Weymouth Railway, continuing the broad gauge from Thingley. Opened by Great Western Railway in 1851, extended to Salisbury 1856, changed to standard gauge in 1874.

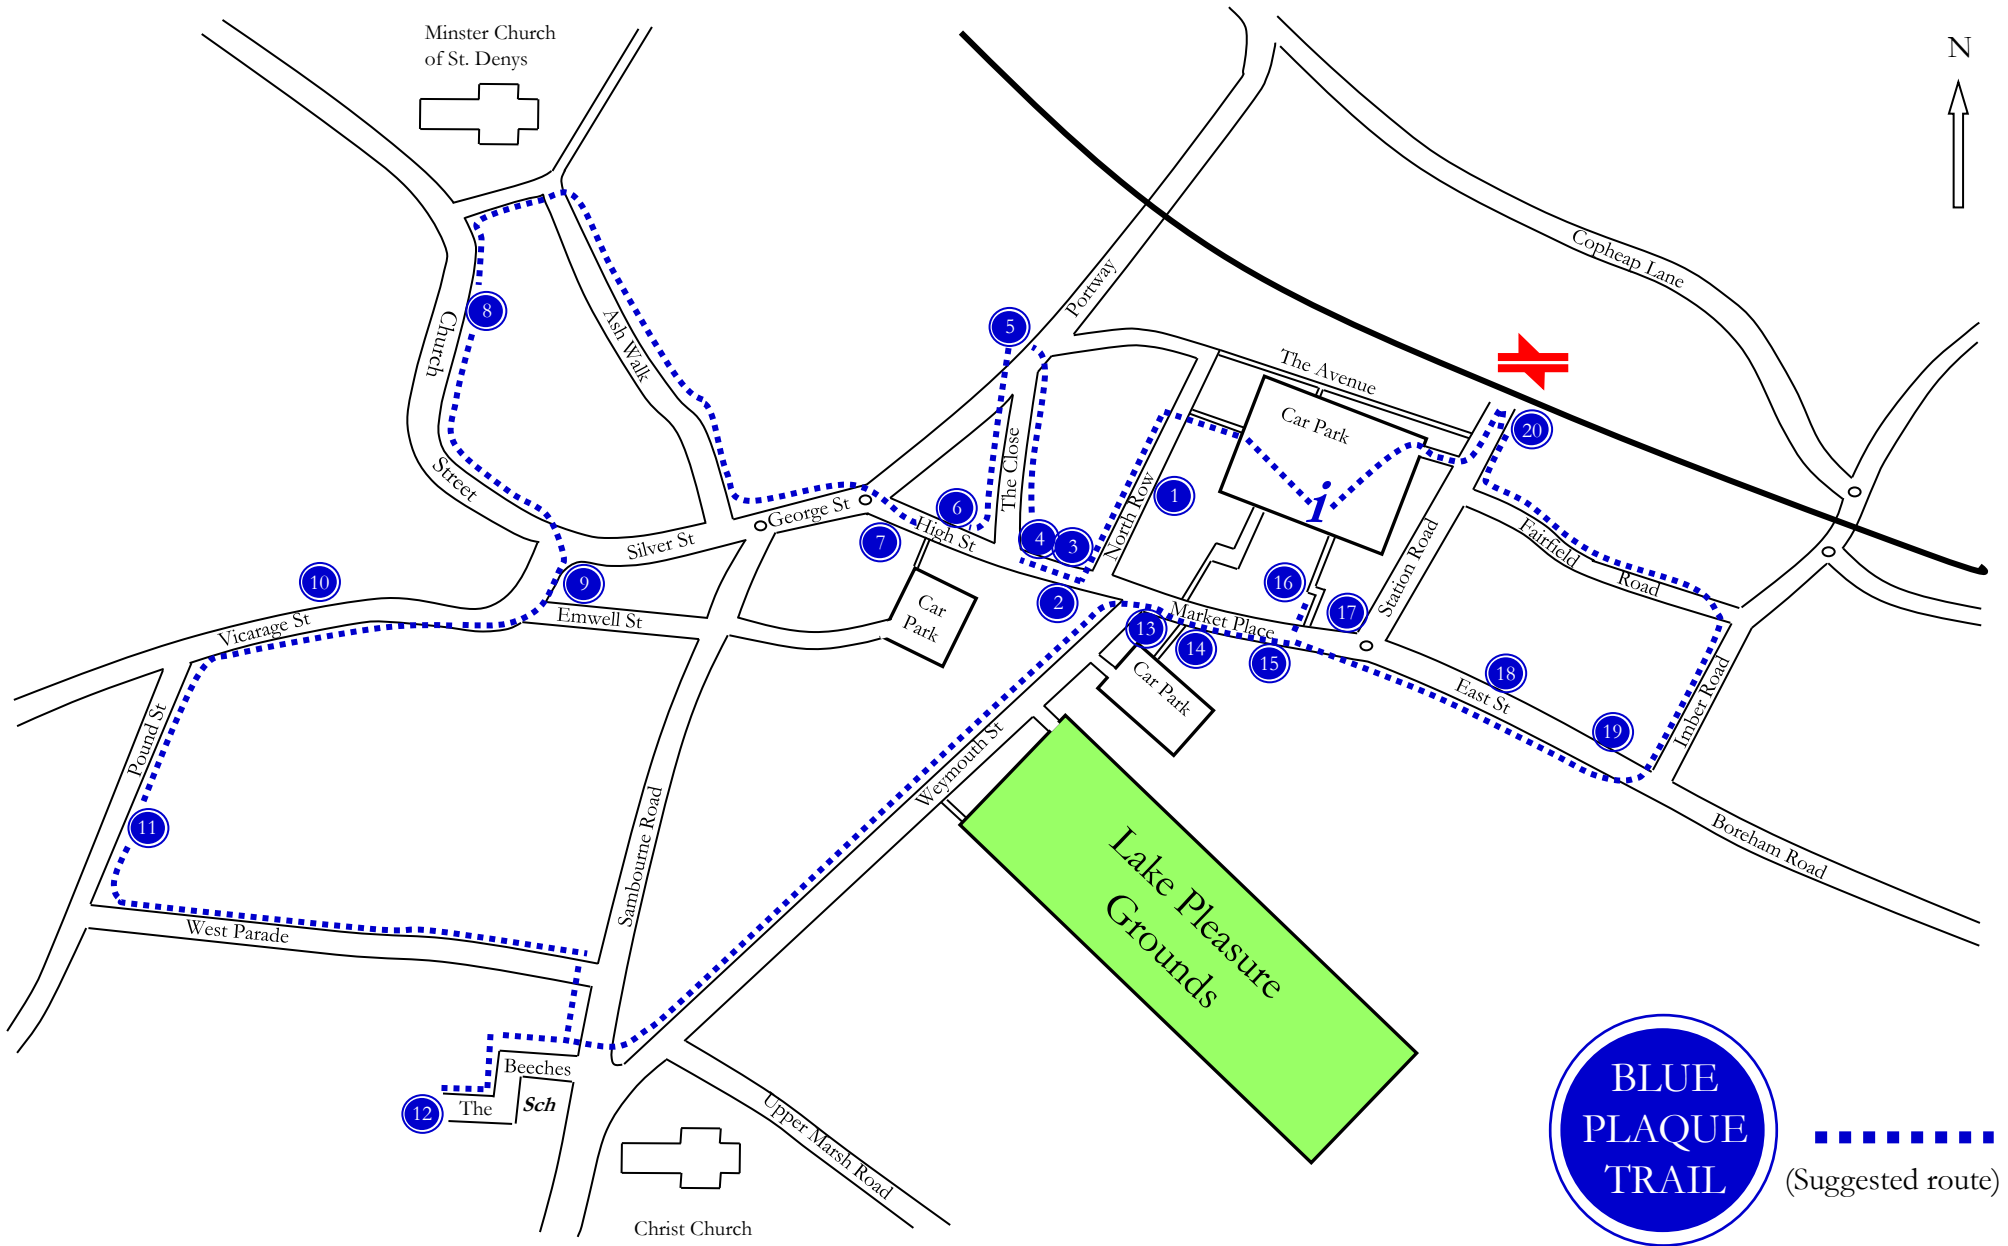

Warminster is a market town nestling within the chalk downland of south west Wiltshire, half way between Salisbury and Bath. Surrounded by three Iron Age (c. 750BC) hill-forts, the town centre retains nearly all its 18th and 19th century buildings in a streetscape that has not changed substantially since the 1880s, despite considerable growth over the intervening period of time.

The trail may be completed in either direction, in full or in part. The full walk takes approximately two hours to complete at a gentle pace over firm and reasonably level ground. The numbers on the map overleaf highlight the location of plaques, and brief details of the buildings are included here. Not all buildings are open to the public. Although the trail seeks to highlight some of the more important buildings and features, the true character of the Town can best be found by enjoying the diverse architecture and many features that will be seen along the way.
